algorithms in obstetrics and gynaecology presents the core knowledge needed to tackle all situations in obstetrics and gynaecology in a structured fashion all algorithms are designed to support rapid decision making in the most clinically relevant situations to minimise the risks of a poor outcome a range of clinical problems are covered from common non life threatening emergencies such as hyperemesis in pregnancy to life threatening acute events such as ectopic pregnancy acute fetal distress or maternal collapse each topic is presented as either an algorithm a care pathway or table of key information and has been carefully structured to

ensure a logical progression of thought to aid anticipation early diagnosis and prompt and appropriate management accompanying key learning points highlight the essential information from the topic based on current national guidelines and clinical evidence the algorithms and care pathways can be used as a reliable and practical resource for day to day practice in obstetrics and gynaecology

in this issue of obstetrics and gynecology clinics of north america guest editors drs amy vanblaricom and brigid mccue bring their considerable expertise to the topic of obstetrics and gynecologic hospitalists and laborists top experts provide clinical updates to help obstetrics and gynecology hospitalists stay current including important topics such as restricted access to termination medical innovations crisis management risk mitigation and diversity equity and inclusion contains 14 relevant practice oriented topics including obstetric and gynecologic hospitalist fellowships medical innovation for obstetrics and gynecologist hospitalists practice and patient experience the gynecologic hospitalist can obstetrics gynecology hospitalists reduce severe maternal morbidity and more provides in depth clinical reviews on obstetrics and gynecologic hospitalists and laborists offering actionable insights for clinical practice presents the latest information on this timely focused topic under the leadership of experienced editors in the field authors synthesize and distill the latest research and practice guidelines to create clinically significant topic based reviews

this textbook takes a new dynamic approach to the basic sciences in obstetrics and gynaecology it teaches candidates all they need to know for the mrcog part 1 examination by extending the understanding of the basic medical sciences and their relevance to obstetrics and gynaecology like conventional textbooks it teaches what is true but it also what is false and why the most complex concepts are discussed in a problem based format so that the relevant basic sciences are taught and drawn together in context

soap for obstetrics and gynecology features over 60 clinical problems with each case presented in an easy to read 2 page layout each step presents information on how that case would likely be handled questions under each category teach the students important steps in clinical care the soap series is a unique resource that also provides a step by step guide to learning how to properly document patient care covering the problems most commonly encountered on the wards the text uses the familiar soap note format to record important clinical information and guide patient care soap format puts the emphasis back on the patient s clinical problem not the diagnosis this series is a practical learning tool for proper clinical care improving communication between physicians and accurate documentation the books not only teach students what to do but also help them understand why students will find these books a must have to keep in their white coat pockets for wards and clinics

a pocket sized quick reference to the protocols clinical pearls and pitfalls to avoid from the major new text obstetrics and gynecology principles for practice it features essential and practical guidelines focusing on what house officers clinicians and third and fourth year medical students need most

this latest contribution to the faam series provides a comprehensive and up to date discussion of anaesthetic management in pregnancy during delivery and in patients undergoing gynaecological surgery with authoritative contributions from international experts it is a practical reference for all anaesthetists and specialist clinicians

while intended for obstetrics and gynaecology specialists this unique format is also useful for

ob gyn fellows as well as housestaff and medical students rotating through ob gyn primarily intended as a study aid the text is written in rapid fire question answer format this way readers receive immediate gratification moreover misleading or confusing foils are not provided this eliminates the risk of erroneously assimilating an incorrect piece of information that makes a big impression questions themselves often contain a pearl intended to reinforce the answer additional hooks may be attached to the answer in various forms including mnemonics visual imagery repetition and humour additional information not requested in the question may be included in the answer emphasis has been placed on distilling trivia and key facts that are easily overlooked that are quickly forgotten and that somehow seem to be needed on board examinations

incorporating the latest version of the apgo guidelines this textbook has been written specifically for medical students taking the clerkship in obstetrics gynecology

basic sciences for obstetrics and gynaecology has become the standard revision aid for students preparing for examinations in obstetrics and gynaecology particularly those candidates for the mrcog part i a wealth of information is presented in a concise didactic format focusing on those facts that are generally considered to be neither contentious nor speculative the fifth edition has been substantially updated to reflect the current understanding of the basic sciences underpinning the practice of obstetrics and gynaecology this book will also be of value to professionals wishing to refresh their basic scientific knowledge cell biology embryology and the placenta anatomy general physiology and biochemistry endocrinology pathology microbiology pharmacology tim chard is professor of obstetrics and gynaecology at st bartholomew s hospital in london richard lilford is professor of health services research at the university of birmingham

myles textbook for obstetrics and gynaecology nursing i and ii two volume set 17e sae 1e e book

this book provides a timely revision of the definitive source for quick reference and up to date information on the primary health care of women containing contributions by leaders in obstetrics gynecology primary care and relevant subspecialties the book presents the latest information from respected authorities new case studies have been added at the end of each chapter to provide useful information for the busy clinician new chapters include elderly patients cardiovascular hypertension the role of applied and genomic molecular biology and nutrition obesity and eating disorders this book is a must have reference for the busy clinician

everything a clinician needs to know about obstetrics and gynecology in a succinct bulleted format the content is limited to only the essential facts necessary for assessment and treatment of disorders in women a perfect review tool for the ob gyn board exam

the aim of this book is to provide a straightforward summary of the knowledge required for preliminary examinations in specialist obstetrics and gynaecology the first part of the examination for membership of the royal college of obstetricians and gynaecologists would be a good example thus the field covered is that of the basic sciences anatomy physiology biochemistry etc as applied to human reproduction most examinations of this type are based on multiple choice questions mcq no apology is made for the fact that the present book addresses the sort of fact which lends itself to testing by this approach there is no discussion of speculative or contentious areas no account of present or future research and no references excellent books are available which treat the topic in a much fuller and more

discursive manner and the present volume does not seek to emulate them readers will be aware that even apparently immutable facts are subject to occasional revision we have attempted to present the state of the art most of the material is generally if not universally accepted a particular problem arises with numerical information

the leading reference on anesthesia during pregnancy and delivery is now in its thoroughly updated fourth edition this volume provides complete information on anesthesia for vaginal delivery cesarean section obstetric complications anesthetic complications anesthesia for nonobstetric disorders during pregnancy and management of the fetus and newborn this edition provides expanded coverage of infectious diseases during delivery including hiv herpes chorioamnionitis labor epidural fever and sepsis the section on anesthetic complications includes a new chapter on the difficult airway failed intubation and cardiac arrest there is a revised chapter on evaluation of the neonate and more information about ct ultrasound and mri

collaborative care has been used successfully in obstetrics and gynecology for years this issue reviews the basic collaborative model that is collaboration among ob gyns midwives and family physicians and includes articles on successful birth center practice secrets to a successful collaboration and collaboration in today s environment dr waldman is past president of acog and his co editor dr kennedy is president of acnm
